Volume 201 1991

Table of contents

No. 1 1–302 issued on October 1, 1991
No. 2 303–522 issued on October 15, 1991
No. 3 523–738 issued on November 1, 1991

Corrections 731

Information for Authors 733–738

Reviews

Mathematical analysis of enzymic reaction systems using optimization principles
R. Heinrich, S. Schuster and H.-G. Holzhütter 1– 21

Cell-free immunity in Cecropia — A model system for antibacterial proteins
H. G. Boman, I. Faye, G. H. Gudmundsson, J.-Y. Lee and D.-A. Lidholm 23– 31

tRNA-like structures — Structure, function and evolutionary significance
R. M. W. Mans, C. W. A. Pleij and L. Bosch 303–324

The superoxide-generating oxidase of phagocytic cells — Physiological, molecular and pathological aspects
F. Morel, J. Doussiere and P. V. Vignais 523–546

Nucleic acids, protein synthesis and molecular genetics

The three-dimensional structure of a DNA hairpin in solution — Two-dimensional NMR studies and structural analysis of d(ATCCTATTTATAGGAT)
M. J. J. Blommers, F. J. M. Van De Ven, G. A. Van Der Marel, J. H. Van Boom and C. W. Hilbers 33– 51

The 5′ untranslated regions of acetylcoenzyme A carboxylase mRNA provide specific translational control *in vitro*
F. López-Casillas and K.-H. Kim 119–127

Structural analysis of the entire proopiomelanocortin gene of *Xenopus laevis*
P. M. T. Deen, D. Terwel, M. J. M. Bussemakers, E. W. Roubos and G. J. M. Martens 129–137

A 60-kDa protein from rabbit reticulocytes specifically recognizes the capped 5′ end of β-globin mRNA
M. Schwemmle, J. Schickinger, M. Bader, T. F. Sarre and K. Hilse 139–145

The polymerase domain of *Streptococcus pneumoniae* DNA polymerase I — High expression, purification and characterization
M. E. Pons, A. Díaz, S. A. Lacks and P. López 147–155

An amplified insect dihydrofolate reductase gene contains a single intron
F. A. Shotkoski and A. M. Fallon 157–160

The *lux* genes of the luminous bacterial symbiont, *Photobacterium leiognathi*, of the ponyfish — Nucleotide sequence, difference in gene organization, and high expression in mutant *Escherichia coli*
C. Y. Lee, R. B. Szittner and E. A. Meighen 161-167

Purification and properties of a high-molecular-mass complex between Val-tRNA synthetase and the heavy form of elongation factor 1 from mammalian cells
Y. A. Motorin, A. D. Wolfson, D. Löhr, A. F. Orlovsky and K. L. Gladilin 325–331

Cloning of a cDNA for a new member of the class of fibril-associated collagens with interrupted triple helices
M. K. Gordon, P. Castagnola, B. Dublet, T. F. Linsenmayer, M. Van Der Rest, R. Mayne and B. R. Olsen 333–338

Malic enzyme in human liver — Intracellular distribution, purification and properties of cytosolic isozyme
M. Żelewski and J. Świerczyński 339–345

Post-transcriptional effect of ultraviolet light on gene expression in human cells — Stabilization of cytokine-induced and poly(I) · poly(C)-induced messenger RNA
G. Hilgers, I. M. Clauss, G. A. Huez and J. Rommelaere 483–488

Determination of the cDNA sequence for the human mitochondrial 75-kDa Fe–S protein of NADH-coenzyme Q reductase
W. Chow, I. Ragan and B. H. Robinson 547–550

Purification and cDNA cloning of *Xenopus laevis* skin peptidylhydroxyglycine N-C lyase, catalyzing the second reaction of C-terminal α-amidation
Y. Iwasaki, T. Kawahara, H. Shimoi, K. Suzuki, O. Ghisalba, K. Kangawa, H. Matsuo and Y. Nishikawa 551–559

Effect of retinoic acid on the synthesis of tissue-type plasminogen activator and plasminogen activator inhibitor-1 in human endothelial cells
E. A. Thompson, L. Nelles and D. Collen 627–632

Multiple mRNA species code for two non-allelic forms of ovine αs2-casein
M. Boisnard, D. Hue, C. Bouniol, J.-C. Mercier and P. Gaye 633–641

Mitochondrial translational-initiation and elongation factors in *Saccharomyces cerevisiae*
A. Vambutas, S. H. Ackerman and A. Tzagoloff 643–652

Analysis of the complex transcription termination region of the *Escherichia coli rrnB* gene
A. Orosz, I. Boros and P. Venetianer 653–659

Protein chemistry and structure

Isolation and characterisation of porcine sorbin
M. Vagne-Descroix, D. Pansu, H. Jörnvall, M. Carlquist, H. Guignard, G. Jourdan, A. Desvigne, M. Collinet, C. Caillet and V. Mutt 53–59

Human and rodent sequence analogs of Alzheimer's amyloid βA4 share similar properties and can be solubilized in buffers of pH 7.4
C. Hilbich, B. Kisters-Woike, J. Reed, C. L. Masters and K. Beyreuther 61–69

Molecular symmetry and arrangement of subunits in extracellular hemoglobin from the nematode *Ascaris suum*
S. Darawshe and E. Daniel 169–173

Possible involvement of Lys603 from *Escherichia coli* glucosamine-6-phosphate synthase in the binding of its substrate fructose 6-phosphate
B. Golinelli-Pimpaneau and B. Badet 175–182

The conformation of porcine-brain natriuretic peptide by two-dimensional NMR spectroscopy
D. Craik, S. Munro, K. Nielsen, P. Shehan, G. Tregear and J. Wade 183–190

Yolk protein in leech — Identification, purification and characterization of vitellin and vitellogenin
J.-L. Baert, M. Britel, M.-C. Slomianny, C. Delbart, B. Fournet, P. Sautiere and J. Malecha 191–198

Crystal structure of the Tyr45Trp mutant of ribonuclease T_1 in a complex with 2'-adenylic acid
G. Koellner, H.-P. Grunert, O. Landt and W. Saenger 199–202

Sequence-specific ^{1}H-NMR assignments and secondary structure of the lipoyl domain of the *Bacillus stearothermophilus* pyruvate dehydrogenase multienzyme complex
F. Dardel, E. D. Laue and R. N. Perham 203–209

Structural studies of yeast Iso-1 cytochrome *c* mutants by resonance Raman spectroscopy
P. Hildebrandt, G. J. Pielak and R. J. P. Williams 211–216

Microcalorimetric investigation of the interactions between the subunits of the bovine pancreatic procarboxypeptidase A-S6 complex
T. Michon, J.-C. Sari, S. Granon, B. Kerfelec and C. Chapus 217–222

Non-random conformation of a mouse IgG_{2a} monoclonal antibody at low pH
W. Jiskoot, M. Bloemendal, B. van Haeringen, R. van Grondelle, E. C. Beuvery, J. N. Herron and D. J. A. Crommelin 223–232

Identification of the cDNA clone which encodes the 58-kDa protein containing the amino acid sequence of rat liver non-specific lipid-transfer protein (sterol-carrier protein 2) — Homology with rat peroxisomal and mitochondrial 3-oxoacyl-CoA thiolases
B. C. Ossendorp, G. P. H. Van Heusden, A. L. J. De Beer, K. Bos, G. L. Schouten and K. W. A. Wirtz 233–239

Conformational change of the haemolymph juvenile-hormone-binding protein from *Galleria mellonella* (L)
E. Wieczorek and M. Kochman 347–353

Conformation of [8-arginine]vasopressin and V_1 antagonists in dimethyl sulfoxide solution derived from two-dimensional NMR spectroscopy and molecular dynamics simulation
J. M. Schmidt, O. Ohlenschläger, H. Rüterjans, Z. Grzonka, E. Kojro, I. Pavo and F. Fahrenholz 355–371

Functional characterization of human recombinant apolipoprotein AIV produced in *Escherichia coli*
N. Duverger, A. Murry-Brelier, M. Latta, S. Reboul, G. Castro, J.-F. Mayaux, J.-C. Fruchart, J. M. Taylor, A. Steinmetz and P. Denèfle 373–383

Pig kidney 3,4-dihydroxyphenylalanine (Dopa) decarboxylase — Primary structure and relationships to other amino acid decarboxylases
B. Maras, P. Dominici, D. Barra, F. Bossa and C. Borri Voltattorni 385–391

Affinity labeling of pig kidney 3,4-dihydroxyphenylalanine (Dopa) decarboxylase with *N*-(bromoacetyl)pyridoxamine 5'-phosphate — Modification of an active-site cysteine
P. Dominici, B. Maras, G. Mei and C. Borri Voltattorni 393–397

Expression of mammalian tyrosine aminotransferase in *Saccharomyces cerevisiae* and *Escherichia coli* — Purification to homogeneity and characterization of the enzyme overproduced in the bacteria
J. B. Dietrich, B. Lorber and D. Kern 399–407

Effects of ions on vanadate-induced photocleavage of myosin subfragment 1
A. Muhlrad, Y. M. Peyser and I. Ringel 409–415

Conformational studies on a peptide fragment representing the RNA-binding N-terminus of a viral coat protein using circular dichroism and NMR spectroscopy
M. van der Graaf and M. A. Hemminga 489–494

Isolation and structural characterization of an insulin-related molecule, a predominant neuropeptide from *Locusta migratoria*
C. Hetru, K. W. Li, P. Bulet, M. Lagueux and J. A. Hoffmann 495–499

Specificity determinants for tyrosine protein kinases — A study with recombinant hirudin mutants
A. Donella-Deana, S. R. Stone and L. A. Pinna 501–505

The catalytic domain of the dihydrolipoyl transacetylase component of the pyruvate dehydrogenase complex from *Azotobacter vinelandii* and *Escherichia coli* — Expression, purification, properties and preliminary X-ray analysis
E. Schulze, A. H. Westphal, G. Obmolova, A. Mattevi, W. G. J. Hol and A. de Kok 561–568

NMR studies of the activation of the *Escherichia coli trp* repressor
E. I. Hyde, V. Ramesh, R. Frederick and G. C. K. Roberts 569–579

Identification and characterization of the lantibiotic nisin Z, a natural nisin variant
J. W. M. Mulders, I. J. Boerrigter, H. S. Rollema, R. J. Siezen and W. M. de Vos 581–584

Structure/activity relationship of eel calcitonin — A study using a newly devised method for designing analogs
A. Inoue, M. Shikano, Y. Komatsu, J. Obata, J. Ochiai, H. Nishide, N. Ito, H. Nagao, K. Kondo, D. Tunemoto, H. Hemmi and N. Numao 607–614

Tricholongins BI and BII, 19-residue peptaibols from *Trichoderma longibrachiatum* — Solution structure from two-dimensional NMR spectroscopy
S. Rebuffat, Y. Prigent, C. Auvin-Guette and B. Bodo 661–674

Purification and characterization of two highly different group II phospholipase A_2 isozymes from a single viperid (*Eristocophis macmahoni*) venom
A. R. Siddiqi, Z. H. Zaidi and H. Jörnvall 675–679

^{1}H-NMR conformational analysis of a high-affinity antigenic 11-residue peptide from the tryptophan synthase β_2 subunit
M. Delepierre, M.-P. Larvor, F. Baleux and M. E. Goldberg 681–693

Assignment of the 600-MHz ^{1}H-NMR spectrum of amicyanin from *Thiobacillus versutus* by two-dimensional NMR methods provides information on secondary structure
A. Lommen, S. Wijmenga, C. W. Hilbers and G. W. Canters 695–702

Enzymology

Latent fibronectin-degrading serine proteinase activity in N-terminal heparin-binding domain of human plasma fibronectin
S. Lambert Vidmar, F. Lottspeich, I. Emod, T. Planchenault and V. Keil-Dlouha 71– 77

Collagen-binding domain of human plasma fibronectin contains a latent type-IV collagenase
S. Lambert Vidmar, F. Lottspeich, I. Emod, J.-M. Imhoff and V. Keil-Dlouha 79– 84

Effect of calcium ions on the processing of pro-opiomelanocortin by bovine intermediate lobe pro-opiomelanocortin-converting enzyme
N. P. Birch, H. P. J. Bennett, F. E. Estivariz and Y. P. Loh 85– 89

The plasma membrane H^+-ATPase from yeast — Effects of pH, vanadate and erythrosine B on ATP hydrolysis and ATP binding
A. Wach and P. Gräber 91– 97

Purification and characterization of a new κ-carrageenase from a marine *Cytophaga*-like bacterium
P. Potin, A. Sanseau, Y. Le Gall, C. Rochas and B. Kloareg 241–247

Purification and chemical modification of a phosphatidylinositol kinase from sheep brain
G. Scholz, G. J. Barritt and F. Kwok 249–255

N-Myristoyl-transferase activity in cancer cells — Solubilization, specificity and enzymatic inhibition of a *N*-Myristoyl transferase from L1210 microsomes
J. A. Boutin, J.-P. Clarenc, G. Ferry, A.-P. Ernould, G. Remond, M. Vincent and G. Atassi 257–263

Some properties of site-specific mutants of human carbonic anhydrase II having active-site residues characterizing carbonic anhydrase III
X. Ren, B.-H. Jonsson and S. Lindskog 417–420

Neutral endopeptidase activity in the interaction of *N*-formyl-L-methionyl-L-leucyl-L-phenylalanine with human polymorphonuclear leukocytes
I. Yuli and P. I. Lelkes 421–430

Characterisation of the DNA-polymerase-α–primase complex from the silk glands of *Bombyx mori*
S. Niranjanakumari and K. P. Gopinathan 431–438

Mechanism of NADPH oxidation catalyzed by horse-radish peroxidase and 2,4-diacetyl-[^{2}H]heme-substituted horse-radish peroxidase
V. De Sandro, C. Dupuy, J. Kaniewski, R. Ohayon, D. Dème, A. Virion and J. Pommier 507–513

Purification and characterisation of 3-hydroxyphenylacetate 6-hydroxylase: a novel FAD-dependent monooxygenase from a *Flavobacterium* species
W. J. H. Van Berkel and W. J. J. Van Den Tweel 585–592

Substrate specificity and stereoselectivity of horse liver alcohol dehydrogenase — Kinetic evaluation of binding and activation parameters controlling the catalytic cycles of unbranched, acyclic secondary alcohols and ketones as substrates of the native and active-site-specific Co(II)-substituted enzyme
H. W. Adolph, P. Maurer, H. Schneider-Bernlöhr, C. Sartorius and M. Zeppezauer 615–625

Spectroscopic characterization of true enzyme-substrate intermediates of aspartate aminotransferase trapped at subzero temperatures
M. Sterk and H. Gehring 703–707

Carbohydrates, lipids and other natural products

Characterization and 400-MHz ^{1}H-NMR analysis of urinary fucosyl glycoasparagines in fucosidosis
J.-C. Michalski, J.-M. Wieruszeski, C. Alonso, P. Cache, J. Montreuil and G. Strecker 439–458

Identification of a novel UDP-Gal:GalNAcβ1-4GlcNAc-R β1-3-galactosyltransferase in the connective tissue of the snail *Lymnaea stagnalis*
H. Mulder, H. Schachter, M. De Jong-Brink, J. G. M. Van Der Ven, J. P. Kamerling and J. F. G. Vliegenthart 459–465

Membranes and bioenergetics

Pressure effects on the binding of vanadate to the sarcoplasmic reticulum calcium-transport enzyme
N. Ronzani, L. Stephan and W. Hasselbach 265–271

Membrane proteins exposed on the external side of the intestinal brush-border membrane have fusogenic properties
H. Thurnhofer, G. Lipka and H. Hauser 273–282

The electrochemical proton potential of *Bacillus alcalophilus*
A. Hoffmann and P. Dimroth 467–473

Isolation, purification and partial characterization of a 30-kDa chlorophyll-*a*/*b*-binding protein from spinach
K.-D. Irrgang, G. Renger and J. Vater 515–522

Purification and characterisation of an archaebacterial succinate dehydrogenase complex from the plasma membrane of the thermoacidophile *Sulfolobus acidocaldarius*
R. Moll and G. Schäfer 593–600

1,25-Dihydroxycholecalciferol-related Na^+/D-glucose transport in brush-border membrane vesicles from embryonic chick jejunum – Modulation by triiodothyronine
H. Debiec, H. S. Cross and M. Peterlik 709–713

Metabolism and metabolic regulation

In vivo ^{31}P-NMR studies of *Desulfovibrio* species – Detection of a novel phosphorus-containing compound
H. Santos, P. Fareleira, C. Pedregal, J. LeGall and A. V. Xavier 283–287

Determination of flux through different metabolite pathways in *Saccharomyces cerevisiae* by ^{1}H-NMR and ^{13}C-NMR spectroscopy
S. Tran-Dinh, M. Herve and J. Wietzerbin 715–721

Signal transduction and molecular neurobiology

Cloning and expression of human ciliary neurotrophic factor
A. Negro, E. Tolosano, S. D. Skaper, I. Martini, L. Callegaro, L. Silengo, F. Fiorini and F. Altruda 289–294

Molecular cloning and characterisation of a novel putative protein-serine kinase related to the cAMP-dependent and protein kinase C families
P. J. Coffer and J. R. Woodgett 475–481

Rapid purification and characterization of protein kinase C from bovine retinal rod outer segments
G. Wolbring and N. J. Cook 601–606

Molecular cell biology

Transcriptional activation of early-response genes by hydrogen peroxide in a mouse osteoblastic cell line
K. Nose, M. Shibanuma, K. Kikuchi, H. Kageyama, S. Sakiyama and T. Kuroki 99–106

Histone hyperacetylation is accompanied by changes in DNA topology *in vivo*
B. Thomsen, C. Bendixen and O. Westergaard 107–111

The influence of transferrin binding to L_2C guinea pig leukemic lymphocytes on the endocytosis cycle kinetics of its receptor
J. Sainte-Marie, M. Vidal, P. Bette-Bobillo, J. R. Philippot and A. Bienvenüe 295–302

Developmental biochemistry and immunology

Low membrane transport activity for cystine in resting and mitogenically stimulated human lymphocyte preparations and human T cell clones
H. Gmünder, H.-P. Eck and W. Dröge 113–117

Polyclonal antibodies elicited against *trans*-diamminedichloroplatinum(II)-modified DNA and their application in nonradioactive hybridization experiments
V. Brabec, O. Vrana, V. I. Kiseleva and A. M. Poverenny 723–730
